

# **VPAT™**

## **Voluntary Product Accessibility Template®**

**Version 1.3**

The purpose of the **Voluntary Product Accessibility Template**, or **VPAT™**, is to assist Federal contracting officials and other buyers in making preliminary assessments regarding the availability of commercial "Electronic and Information Technology" products and services with features that support accessibility. It is assumed and recommended that offerors will provide additional contact information to facilitate more detailed inquiries.

The first table of the Template provides a summary view of the Section 508 Standards. The subsequent tables provide more detailed views of each subsection. There are three columns in each table. Column one of the Summary Table describes the subsections of subparts B and C of the Standards. The second column describes the supporting features of the product or refers you to the corresponding detailed table, e.g., "equivalent facilitation." The third column contains any additional remarks and explanations regarding the product. In the subsequent tables, the first column contains the lettered paragraphs of the subsections. The second column describes the supporting features of the product with regard to that paragraph. The third column contains any additional remarks and explanations regarding the product.

### ***Section 1194.22 Web-based Internet information and applications – Detail***

**VPAT™**

**Voluntary Product Accessibility Template®**

<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Supports	"alt" text for graphics has been provided on PageUp People's Web products.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	n/a	Not applicable. PageUp People does not create multimedia files.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Supports	Most page styles within PageUp People have good black and white contrast between the highlighted/selected table rows and the "unhighlighted" table rows. Color is not used to convey information.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Supports	Documents are readable in PageUp People without the associated cascading style sheet (CSS) file.
(e) Redundant text links shall be provided for each active region of a server-side image map.	n/a	PageUp People's products do not use server-side image maps.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	n/a	PageUp People's products do not use client-side image maps.
(g) Row and column headers shall be identified for data tables.	Supports with exceptions	Work is ongoing to test and update all

			data tables, though the vast majority have been updated with appropriate HTML tagging.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Supports with exceptions		Work is ongoing to test and update all data tables, though the vast majority have been updated with appropriate HTML tagging.
(i) Frames shall be titled with text that facilitates frame identification and navigation	n/a		PageUp People's products do not use frames.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Supports		PageUp People's products do not use animations, all of the pages are static and do not produce screen flicker.
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	Supports		At this time, all features on PageUp People's products are usable with assistive technology, therefore, a text-only version is not required.
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	Supports with exceptions		Work is ongoing to test and update all scripts.
(m) When a web page requires that an applet, plug-in or other	Supports		PageUp People's products do not

application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).		require applets or plug-ins.
(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Supports	All PageUp People web forms follow HTML standards that are fully compliant with assistive technology.
(o) A method shall be provided that permits users to skip repetitive navigation links.	Supports	All PageUp People navigation follows HTML standards that are fully compliant with assistive technology.
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Supports	PageUp People products do not require timed responses.

Note to 1194.22: The Board interprets paragraphs (a) through (k) of this section as consistent with the following priority 1 Checkpoints of the Web Content Accessibility Guidelines 1.0 (WCAG 1.0) (May 5 1999) published by the Web Accessibility Initiative of the World Wide Web Consortium: Paragraph (a) - 1.1, (b) - 1.4, (c) - 2.1, (d) - 6.1, (e) - 1.2, (f) - 9.1, (g) - 5.1, (h) - 5.2, (i) - 12.1, (j) - 7.1, (k) - 11.4.
